The water pump on my 2006 3l D4D 4x4 is a one-piece unit and a part of it is definitely underneath the timing belt. I bought the bakkie new and the pump has never been replaced. If the pump consists of a two piece assembly it appears as if you can remove the pump unit without even touching the timing belt cover leaving the bottom casing in place.

3lt D4D Waterpump (and Cambelt) Replacement Step by Step ...

The SST tool is no special tool. There are multiple ways to remove. But first, have you undone the rear bracket that holds the pump in position and removed the two main nuts on the front side of the pump? The method of "knocking" it out is fairly simple. Use a heavy club hammer and tap the pump pulley nut that's on the end.

1kzte : how to remove injection pump | Land Cruiser Club

Ok all, its been established that to change the water pump out on a 1KZTE the timing belt and the cam seal retaining plate must be removed to access the water pump... I have just finshed the job and the following is a brief outline of whats involved along with a few photos of the process for those who may need a bit a reference.

Does Timing Belt need to come off to replace Water Pump ...

The XtremepowerUS 2000GPH 1/2HP Clean/ Dirty Water Submersible Pump is an excellent submersible water removal pump with a maximum submersion depth of 16 feet, so if you need the pump to remove areas with greater depth. 20 feet of hose and a ten-foot-long extension cord, this is a great multi-purpose pump.
