Did bilateral and regional bargaining choke off international commerce and finance in the 1930s and prolong the Great Depression? Is the open world economic system now being placed at risk by explicitly discriminatory practices that erode respect for the GATT, the IMF, and the IBRD? Most political economists would answer in the affirmative, warning that bilateral and regional preferences are at best inefficient and at worst catastrophic. By contrast, Kenneth Oye shows how economic discrimination can foster international economic openness by facilitating political exchange.

Am I depressed or just unhappy? In the last two decades, antidepressants have become staples of our medicine cabinets—doctors now write 120 million prescriptions annually, at a cost of more than 10 billion dollars. At the same time, depression rates have skyrocketed; twenty percent of Americans are now expected to suffer from it during their lives. Doctors, and drug companies, claim that this convergence is a public health triumph: the recognition and treatment of an under-diagnosed illness. Gary Greenberg, a practicing therapist and longtime depressive, raises a more disturbing possibility: that the disease has been manufactured to suit (and sell) the cure. Greenberg draws on sources ranging from the Bible to current medical journals to show how the idea that unhappiness is an illness has been packaged and sold by brilliant scientists and shrewd marketing experts—and why it has been so successful. Part memoir, part intellectual history, part expos é—including a vivid chronicle of his participation in a clinical antidepressant trial—Manufacturing Depression is an incisive look at an epidemic that has changed the way we have come to think of ourselves.

Winner of the 2018 American Academy of Diplomacy Douglas Dillon Award Shortlisted for the 2018 Duff Cooper Prize in Literary Nonfiction " [A] brilliant book...by far the best study yet " (Paul Kennedy, The Wall Street Journal) of the gripping history behind the Marshall Plan and its long-lasting influence on our world. In the wake of World War II, with Britain ' s empire collapsing and Stalin ' s on the rise, US officials under new Secretary of State George C. Marshall set out to reconstruct western Europe as a bulwark against communist authoritarianism. Their massive, costly, and ambitious undertaking would confront Europeans and Americans alike with a vision at odds with their history and self-conceptions. In the process, they would drive the creation of NATO, the European Union, and a Western identity that continue to shape world events. Benn Steil ' s " thoroughly researched and well-written account " (USA TODAY) tells the story behind the birth of the Cold War, told with verve, insight, and resonance for today. Focusing on the critical years 1947 to 1949, Benn Steil ' s gripping narrative takes us through the seminal episodes marking the collapse of postwar US-Soviet relations—the Prague coup, the Berlin blockade, and the division of Germany. In each case, Stalin ' s determination to crush the Marshall Plan and undermine American power in Europe is vividly portrayed. Bringing to bear fascinating new material from American, Russian, German, and other European archives, Steil ' s account will forever change how we see the Marshall Plan. " Trenchant and timely...an ambitious, deeply researched narrative that...provides a fresh perspective on the coming Cold War " (The New York Times Book Review), The Marshall Plan is a polished and masterly work of historical narrative. An instant classic of Cold War literature, it " is a gripping, complex, and critically important story that is told with clarity and precision " (The Christian Science Monitor).

A history of the United States in the twentieth century, featuring sociological and cultural events, as well as strictly historical, and using many pertinent literary excerpts.

As The Giving Tree turns fifty, this timeless classic is available for the first time ever in ebook format. This digital edition allows young readers and lifelong fans to continue the legacy and love of a classic that will now reach an even wider audience. "Once there was a tree...and she loved a little boy." So begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave and gave. This is a tender story, touched with sadness, aglow with consolation. Shel Silverstein's incomparable career as a bestselling children's book author and illustrator began with Lafcadio, the Lion Who Shot Back. He is also the creator of picture books including A Giraffe and a Half, Who Wants a Cheap Rhinoceros?, The Missing Piece, The Missing Piece Meets the Big O, and the perennial favorite The Giving Tree, and of classic poetry collections such as Where the Sidewalk Ends, A Light in the Attic, Falling Up, Every Thing On It, Don't Bump the Glump!, and Runny Babbit. And don't miss the other Shel Silverstein ebooks, Where the Sidewalk Ends and A Light in the Attic!

"Identifies 10 pervasive and seemingly impossible challenges including immigration reform, income inequality, political corruption and Islamic terrorism and shows that each has a solution, and not merely a hypothetical one, but one that has been proven in a real hotspot in the world, "--NoveList.

In this book, Hoover expounds and vigorously defends what has come to be called American exceptionalism: the set of beliefs and values that still makes America unique. He argues that America can make steady, sure progress if we preserve our individualism, preserve and stimulate the initiative of our people, insist on and maintain the safeguards to equality of opportunity, and honor service as a part of our national character.
