surprise me at any point.
The human characters,
though, were just not very
interesting. A flighty young

An epic science fiction
series by Larry Niven set on
the original Big Dumb
Object. Imagine a giant
ring, a million miles wide,
with a radius of one Earth
orbit and a circumference of
some 600 million miles,
orbiting around a star. The
Ring is far enough out that
the heat is comfortable for

humans to live on.

Ringworld is one of the most original stories I have ever read. A beautiful balance between fascinating characters and adventurous

challenges. True story
telling at it's best by one
of the genre's greats. The
story takes place
sufficiently far enough in
the future to allow anything
to exist or happen.
