World's Most Dangerous Robot - YouTube

Flying robots can hover over dangerous places that human workers cannot access. Furthermore, these robots can more easily locate victims because they can "see" more. Scientists expect that flying robots will become an indispensable part of search and rescue in the near future\u2014especially in areas like the Swiss Alps where avalanches are common .

10 Strange Robots That Could Potentially Save Lives ...

One of the best things about robots is their ability to do jobs that would be just plain dangerous for people. Not only can robots operate in environments where humans can't, but they can also take on challenges that are hazardous. Robots can explore beneath the sea, investigate volcanoes, and much more. In many cases, however, they are simply taking over jobs that are tedious and have a low margin for error.
