3 Laplace's Equation We now turn to studying Laplace's equation $\nabla^2 u = 0$ and its inhomogeneous version, Poisson's equation, $\nabla^2 u = f$: We say a function u satisfying Laplace's equation is a harmonic function. 3.1 The Fundamental Solution Consider Laplace's equation in R^n , $\nabla^2 u = 0$ $x \in R^n$: Clearly, there are a lot of functions u which ...

Here we will describe all integral solutions to Mordell's equation for some selected values of k , 2 and make a few comments at the end about rational solutions. For further examples of the techniques we use to find integral solutions, see [1, Chap. 14]. 2. Examples without Solutions To prove $y^2 = x^3+k$ has no integral solution for speci c values ...

Numerical solution of initial boundary value problems involving maxwell's equations in isotropic media Abstract: Maxwell's equations are replaced by a set of finite difference equations. It is shown that if one chooses the field points appropriately, the set of finite difference equations is applicable for a boundary condition involving perfectly conducting surfaces.
