Surveying the dynamic field of engineering research, *Directions in Engineering Research* first presents an overview of the status of engineering research today. It then examines research and needs in a variety of areas: bioengineering; construction and structural design; energy, mineralogy, and the environment; information science and computers; manufacturing; materials; and transportation. Specific areas of current research opportunity are discussed in detail, including complex system software, advanced engineered materials, manufacturing systems integration, bioreactors, construction robotics, biomedical engineering, hazardous material control, computer-aided design, and manufacturing modeling and simulation. The authors' recommendations call for funding stability for engineering research programs; modern equipment and facilities; adequate coordination between researchers; increased support for high-risk, high-return, single-investor projects; recruiting of new talent and fostering of multidisciplinary research; and enhanced industry support. Innovative ways to improve the transfer of discoveries from the laboratory to the factory are also presented.

For fans of *Reading Lolita in Tehran*, a true story of forbidden love set against the rich cultural and political backdrop of modern-day Iran. Jennifer Klinec is fearless. In her thirties, she abandons her bland corporate job to launch a cooking school from her London apartment and travel the world in search of delicious recipes and obscure culinary traditions. Her journey takes her to Iran, where she seeks out a local woman to learn the secrets of Persian cuisine. Vahid is suspicious of the strange foreigner who turns up in his mother's kitchen. Unused to such a bold and independent woman, he is frustrated to find himself, the prized only son of the house, largely ignored for the first time. But when the two are thrown together on an unexpected adventure, they discover a mutual attraction that draws them irresistibly toward each other—but also pits them against harsh Iranian laws and customs, which soon threaten to tear the unlikely lovers apart. Getting under the skin of one of the most complex and fascinating nations on earth, *THE TEMPORARY BRIDE* is a soaring, intricately woven story of being loved, being fed, and struggling to belong. \*Includes Reading Group Guide\*

Challenging traditional marketing concepts like the 4 Ps, *Marketing Strategies* examines the key factors affecting marketing in today's competitive business environment: sustainability, ethics, market orientation, the impact of technology and globalisation.
