### SB-800 AF Speedlight | Nikon

Throughout most of the world where the metric system is observed, guide numbers are expressed as a unitless numeric value like 34, even though they are technically a composite unit of measure that is a two-factor product:  $f \times \text{number} \times \text{meters}$ . As such, guide numbers can be reduced either to distance in meters or to  $f$  stops depending on how one uses the guide number in a calculation.
