The insider's guide to developing visually compelling, easy-to-use SharePoint 2010 business solutions with Microsoft's new Silverlight 5. * * *Helps Microsoft developers master today's easiest, most powerful new approach to building rich custom SharePoint solutions. *Solution walkthroughs teach specific techniques through the construction of useful, working solutions. *Covers developing web parts and extensions, expanding functionality of sandboxed solutions, cross-browser compatibility, advanced services, mashups, and more With SharePoint 2010, developers can create richer, more compelling, and more efficient user interfaces than ever before. This book teaches experienced ASP.NET developers how to build them with Silverlight 5 - the easiest, cleanest way to get the job done. Utilizing fully explained code listings, two Microsoft insiders teach everything developers they need to know. They teach key concepts through the creation of useful working solutions, and present code that teaches superior design as well as efficient programming. Readers can start from the beginning if they're new to both SharePoint and Silverlight, or skip the first few chapters if they're already familiar with developing for either or both of them. After explaining the tight integration between SharePoint 2010 and Silverlight 5, the authors show how to use Silverlight to overcome key limitations of 'sandboxing'; design more secure, scalable SharePoint solutions; and choose the right approaches to accessing data from Silverlight. A complete 'Building Solutions' section offers cookbook solutions for these and other advanced tasks: * * *Building out-of-browser applications. *Supporting webcams. *Constructing geocoding and mapping applications. *Creating mashups to combine data from multiple sources. *Integrating with Search, Excel Services, and Visio Services

Few IT professionals take the time to learn what needs to be known to do disaster recovery well. Most labor under the pretense that good administration equals close to five-nines uptime. Most technical people do not see the value of planning for disasters until the unexpected has already happened, and the effects of a disaster involving a SharePoint farm—which today houses business information, line-of-business applications, sensitive information, extranets, and other highly important assets—can be staggering. Pro SharePoint 2010 Disaster Recovery and High Availability will take you through a step-by-step process to show how to build an awareness and reaction plan for the inevitable. With a focus on real-world experiences and war stories, author Stephen Cummins weaves an expert tale of woe response and offers you: Ways to see the warning signs of disaster, and ways to avoid it Ways to respond to a disaster while it is happening Perhaps most importantly, how to develop a plan to deal with disaster when it inevitably does happen

Pro SharePoint 2010 Administration is a practical guide to SharePoint 2010 for intermediate to advanced SharePoint administrators and power users, covering the out-of-the-box feature set and capabilities of Microsoft's collaboration and business productivity platform. SharePoint 2010 is an incredibly complex product, with many moving parts, new features, best practices, and "gotchas." Author Rob Garrett distills SharePoint's portfolio of features, capabilities, and utilities into an in-depth professional guide—with no fluff and copious advice—that is designed from scratch to be the manual Microsoft never wrote. Starting with a detailed deployment and initial configuration walkthrough, the book covers all major feature areas, including document management, social computing, metadata management, and administration. You'll also learn about planning for capacity, backup administration and disaster recovery, business intelligence, monitoring, and more. Unlike other books, Pro SharePoint 2010 Administration covers all elements of the product, but has a specific emphasis on features new and enhanced in the 2010 release. Pro SharePoint 2010 Administration is the only book you'll need as you set out to deploy and administer SharePoint 2010.
