Silver Recovery Products. The Pi series Steel Mesh Cores are created with simplicity in mind. The core replacement has a female garden hose fitting, which simply screws on to the fix inlet in each of the Pi buckets. We have 3 different sizes you can choose from, which can be matched based specific volumes per film developing site. Minimums apply.

~~Pyromet | Photographic Film Silver Recovery~~

Arch Enterprises recovers silver from photographic film and photographic papers through our comprehensive film silver recovery and recycling process. We have the capability to handle large amounts of scrap silver-bearing films and photo papers. From full truck-loads to smaller amounts we can handle your material quickly and efficiently.

~~Photographic Film Silver Recovery | Arch Film Recycling~~

The silver is recovered from solution by electroplating it onto a cathode. A controlled, direct electrical current is passed between two electrodes suspended in the silver-bearing solution. Silver is deposited on the cathode in the form of nearly pure silver plate. The cathodes are removed periodically and the silver is stripped off for sale or reuse.

~~Silver Recovery Methods~~

Kodak made test papers to determine the silver content of the solution. It took about 3 days to remove enough silver so that it was safe to discharge into the sewer system. Acceptable level was around 50ppm.
