four year colleges and universities. It takes an intuitive approach to calculus and focuses on the application of methods to real-world problems. Throughout the text, calculus is treated as a problem solving science of immense capability.

Calculus With Analytic Geometry 2nd Edition: George F ...

Let the legs be a and b and the hypotenuse c , and arrange four replicas of the triangle in the corners of a square of side $a + b$, as shown on the right in Fig. 1.5. Then the area of the large square equals 4 times the area of the triangle plus the area of the small square; that is, $(a + b)^2 = 4(ab) + c^2$.
