Some examples: engine sizes va small brush-cutter or chainsaw may have an engine of about 30cc, (about the size of your finger). vsmall outboards and motor bikes are from about 60cc upwards vmowers are about 70 or 80cc, vmiddle size outboards 250cc to 500cc. (A coke can is 330cc.) vcar engines from 1000cc (1 litre).

Student Introduction to small engines  
A small engine is the general term for a wide range of small-displacement, low-powered internal combustion engines used to power lawn mowers, generators, concrete mixers and many other machines that require independent power sources. These engines often have simple designs, for example an air-cooled single-cylinder petrol engine with a pull-cord starter, capacitor discharge ignition and a gravity-fed carburettor. Engines of similar design and displacement are also used in smaller vehicles such a
