Soil Fertility And Land Productivity

The upcoming discussion will update you about the difference between soil fertility and productivity.

Difference # Soil Fertility: 1. It is considered as an index of available nutrient to plants. 2.

Read Free Soil Fertility And

One of the factors for crop production; the others are water supply etc. 3. Can be analysed in lab. 4. It is the potential status of the soil to produce crops. 5. Depends upon physical chemical and biological factors of soil. 6.
