SHOCKING. CONTROVERSIAL. UNPRECEDENTED. A CASE LIKE UNLIKE ANY OTHER IN THE ANNALS OF UFO INVESTIGATION, DNA RESEARCH, OR ALIEN ABDUCTION. Sydney, Australia. July 23, 1992. Twenty-eight-year-old Peter Khoury was awoken by what appeared to be two females□both striking and unearthly□kneeling on his bed. What transpired between them was a physical assault as bizarre and disorienting as it was unnatural. Then, as quickly as they had arrived, they vanished. Khoury had become one of a legion of alien abductees with inexplicable experiences, but this particular incident stood apart from all the others. This time, there was evidence□two strands of white-blond hair from one of the females. Khoury□s case would result in the very first forensic DNA analysis of □alien abduction□ evidence and revealed an extraordinary biological anomaly□one genetically close to human yet almost impossibly far from the human mainstream. A gripping account of one of the great mysteries of our time, Hair of the Alien, brings us closer than ever before to understanding our past, our origings, and our place in the universe.

Toshie Takahama reveals the secrets of some of the techniques required to produce complex

models using Origami. The examples included in this manual include som.

Take Control of Your Data and Use Python with ConfidenceRequiring no prior programming experience, Managing Your Biological Data with Python empowers biologists and other life scientists to work with biological data on their own using the Python language. The book teaches them not only how to program but also how to manage their data. It shows how

If Tripping with Allah is a road book, it□s a road book in the tradition of 2001: A Space Odyssey, rather than On the Road. Amazonian shamanism meets Christianity meets West African religion meets Islam in this work of reflection and inward adventure. Knight, the □Hunter S. Thompson of Islamic literature□ seeks reconciliation between his Muslim identity and his drinking of ayahuasca, a psychedelic tea that has been used in the Amazon for centuries. His experience becomes an opportunity to investigate complex issues of drugs, religion, and modernity. Though essential for readers interested in Islam or the growing popularity of ayahuasca, this book is truly about neither Islam nor ayahuasca. Tripping with Allah provides an accessible look into the construction of religion, the often artificial borders dividing these constructions, and the ways in which religion might change in an increasingly globalized world. Finally, Tripping with Allah not only explores Islam and drugs, but also Knight□s own process of creativity and discovery.

To make sense of the world, we□re always trying to place things in context, whether our environment is physical, cultural, or something else altogether. Now that we live among digital, always-networked products, apps, and places, context is more complicated than ever□starting with "where" and "who" we are. This practical, insightful book provides a powerful toolset to help information architects, UX professionals, and web and app designers understand and solve the many challenges of contextual ambiguity in the products and services they create. You□ll discover not only how to design for a given context, but also how design participates in making context. Learn how people perceive context when touching and navigating digital environments See how labels, relationships, and rules work as building blocks for context Find out how to make better sense of cross-channel, multi-device products or services Discover how language creates infrastructure in organizations, software, and the Internet of Things Learn models for figuring out the contextual angles of any user experience

It□s not easy being an ordinary teenager leading a hazardous and exciting double life. The Garmaurians, the most advanced species in the universe, wiped themselves out with a bio-weapon in a senseless civil war. And, in a desperate attempt to protect the secret of the potentially dangerous Trion technology - the ability to manipulate the fundamental particle of the universe - their leader sends one last covert mission to Earth. The mission goes horribly wrong, leaving Billy Caudwell; an overweight, acne-scarred 14 year old, with the Mind Profile of a military genius, a huge battle fleet and a mission to unite the intelligent species of the universe in a Universal Alliance. With people to rescue, space fleets to battle and villains to defeat, Billy has to overcome his own inhibitions, insecurities and a vicious bully before he can start saving the universe. Welcome, dear readers, to the exciting universe of First Admiral.

Esther Amini grew up in Queens, New York, during the free-wheeling 1960s. She also grew up in a Persian-Jewish household, the American- born daughter of parents who had fled

Mashhad, Iran. In CONCEALED she tells the story of being caught between these two worlds: the dutiful daughter of tradition-bound parents who hungers for more self-determination than tradition allows. Exploring the roots of her father's deep silences and explosive temper, her mother's flamboyance and flights from home, and her own sense of indebtedness to her two Iranian-born brothers, Amini uncovers the story of her parents' early years in Mashhad, Iran's holiest Muslim city; the little known history and persecution of Mashhad's underground Jews; the incident that steeled her mother's resolve to leave; and her parents' arduous journey to the United States, where they found themselves facing a new threat to their traditions: the threat of freedom. Determined to protect his only daughter from corruption, Amini's father prohibits talk, books, higher education, and tries to push her into an early Persian marriage. Can she resist? Should she? Focused intently on what she stands to gain, Amini eventually comes to see what she also stands to lose: a family and community bound together by food, celebrations, sibling escapades, and unexpected acts of devotion by parents to whom she feels invisible. In this poignant, funny, entertaining and uplifting memoir, Amini documents with keen eye, quick wit, and warm heart, how family members build, buoy, wound, and save one another across generations; how lives are shaped by the demands and burdens of loyalty and legacy; and how she rose to the challenge of deciding what to keep and what to discard.
