Spiders, facts and information - Animals

Spiders (order Araneae) are air-breathing arthropods that have eight legs, chelicerae with fangs generally able to inject venom, and spinnerets that extrude silk. They are the largest order of arachnids and rank seventh in total species diversity among all orders of organisms. Spiders are found worldwide on every continent except for Antarctica, and have become established in nearly every ...

Spider - Wikipedia

Hunting spiders is the catch all term for all types of spiders that do not spin webs to catch prey. Wolf spiders, jumping spiders and crab spiders might be the most common hunting spiders found around the neighborhood. Often the jumping spiders and crab spiders hang out on flowers and plants seeking an unsuspecting insect to stop by.
