Geschwindner's 2nd edition of Unified Design of SteelStructures provides an understanding that structural analysisand design are two integrated processes as well as the necessaryskills and knowledge in investigating, designing, and detailingsteel structures utilizing the latest design methods according tothe AISC Code.The goal is to prepare readers to work in designoffices as designers and in the field as inspectors. This new edition is compatible with the 2011 AISC Code as wellas marginal references to the AISC manual for design examples andillustrations, which was seen as a real advantage by the surveyrespondents. Furthermore, new sections have been added on: DirectAnalysis, Torsional and flexural-torsional buckling of columns,Filled HSS columns, and Composite column interaction. Morereal-world examples are included in addition to new use ofthree-dimensional illustrations in the book and in the imagegallery, an increased number of homework problems, and mediaapproach Solutions Manual, Image Gallery.

An introductory textbook for teaching structural steel design to civil and structural engineering students.

This classic manual for structural steelwork design was first published in 1956. Since then, it has sold many thousands of copies worldwide. The fifth edition is the first major revision for 20 years and is the first edition to be fully based on limit state design, now used as the primary design method, and on the UK code of practice, BS 5950. It provides, in a single volume, all you need to know about structural steel design.

BUILD WITH STEEL introduces beginners to load and resistance factor design (LRFD) for steel buildings. The book covers the topics encountered in undergraduate steel design courses and on national exams (FE and PE). The full color layout is rich with photos, illustrations, and examples. It carefully explains the basis and application of the tables and specifications found in the AISC Steel Construction Manual (14th edition). Royalty Free.
