See Business Cycle. Calling changes in the stock market as Stock market cycles a "cycle" is a misnomer, because of its non-cyclical nature. Changes in stock returns are primarily determined by external factors such as the U.S. monetary policy, the economy, inflation, exchange rates, and socioeconomic conditions. Intellectual capital does not affect a company stock's current earnings. Intellectual capital contributes to a stock's return growth. Milton Friedman believed that for the most part, exc

### How this stock market rally differs from past cycles ...

Now that you know how the stock market and economic cycles relate in time (the stock market leads by approximately three months), you can begin thinking of strategies that can work at certain times. For example, when economists have announced a recession has begun, you can expect the Federal Reserve to begin policies to push interest rates down, which will push prices for bonds higher.

### Stock Market, Economic Cycles, and Investment Timing ...

Besides the stock market in aggregate going through peaks and valleys, there are smaller cycles affecting different types of stocks - value stocks may cycle in an out of favor relative to growth stocks, or smaller stocks relative to big ones. Individual industry sectors may also experience their own cycles. Interest rate conditions are an x-factor

### Stock Market Cycles : Understanding Market Cycles

The cycles derived from prices are based on High, Low and Range (i.e. difference between high and low). The most powerful is the square of the range. The absolute number at high, low or that of range is assumed to be forming a time cycle with so many days, weeks or months. ... Sell a Gann Stock Market Course and a Gann Commodities Course (i.e ...
