Originally published in the 1940s, the author, a master of his craft, has clearly and concisely explained the making of both hand and string puppets, and also clearly shown how they may be used in appropriate settings. With the idea of giving assistance to the novice, and help to the more advanced student, the book is written in plain and concise language the diagrams and photographs should explain the intricacies of puppet-making, leaving the individual to fill in the details from his own imagination. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Hesperides Press are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. Stephen's bra is starting to slip. His pantyhose are sagging. His knickers keep falling down. Oh, the shame of it. He stole a gizmo-and now it's paying him back .Another crazy yarn from Australia's master of madness. The Paul Jennings phenomenon began with the publication of Unrealn 1985. Since then, his stories have been devoured all around the world.

Since its initial publication in hardcover in 2003, Fires in the Bathroom has been through multiple printings and received the attention of teachers across the country. Now in paperback, Kathleen Cushman's groundbreaking book offers original insights into teaching teenagers in today's hard-pressed urban high schools from the point of view of the students themselves. It speaks to both new and established teachers, giving them firsthand information about who their students are and what they need to succeed. Students from across the country contributed perceptive and pragmatic answers to questions of how teachers can transcend the barriers of adolescent identity and culture to reach the diverse student body in today's urban schools. With the fresh and often surprising perspectives of youth, they tackle tough issues such as increasing engagement and motivation, teaching difficult academic material, reaching English-language learners, and creating a classroom culture where respect and success go hand in hand.

New DSM-5 content! Whether it's an entire course on psychiatric nursing or integrating these principles into an existing course, this is the text that's concise, engaging, and informative. It offers an evidence-based, holistic approach to mental health nursing—in a streamlined format that explores nursing diagnoses for both physiological and psychological disorders. It's the psychiatric nursing text that students actually read, understand, and use.

Olson is a former skeptic who began investigating evidence of life after death after the passing of his father. This book is a comprehensive resource answering the most crucial questions about what happens when we die. He considers near-death experiences, after-death communications, spirit contact through mediums, past lives, past-life memories, out-of-body experiences, dream visitations, and much more.

The classic personal account of Watson and Crick's groundbreaking discovery of the structure of DNA, now with an introduction by Sylvia Nasar, author of A Beautiful Mind. By identifying the structure of DNA, the molecule of life, Francis Crick and James Watson revolutionized biochemistry and won themselves a Nobel Prize. At the time, Watson was only twenty-four, a young scientist hungry to make his mark. His uncompromisingly honest account of the heady days of their thrilling sprint against other world-class researchers to solve one of science's greatest mysteries gives a dazzlingly clear picture of a world of brilliant scientists with great gifts, very human ambitions, and bitter rivalries. With humility unspoiled by false modesty, Watson relates his and Crick's desperate efforts to beat Linus Pauling to the Holy Grail of life sciences, the identification of the basic building block of life. Never has a scientist been so truthful in capturing in words the flavor of his work.

"Can't wait for book 2!" Michelle, All Romance Reviews Blog An orphaned, small-town, southern girl, held hostage by responsibility and self-doubt. A Hollywood A-list mega-star, on the run from his latest scandal and with everything to lose. A chance encounter that leads to an unlikely arrangement and epic love affair that will change them both forever. When his co-star and real-life girlfriend is caught cheating on him by the tabloids, A-list hottie, Jack Eversea, finds himself in sleepy Butler Cove, South Carolina. Jack hopes the sultry southern heat in this tiny coastal Lowcountry town will hide him not only from the tabloids and his cheating girlfriend, but his increasingly vapid life and the people who run it. He doesn't count on meeting Keri Ann Butler. Keri Ann has relied on herself so long, dealing with her family's death and the responsibilities of keeping up her family's historic mansion, that boys and certainly the meager offering of eligible boys in Butler Cove, have never figured into her equation. But fate has other plans. Suddenly face to face with the man who played the movie role of her favorite fictional character, Jack has Keri Ann yearning for everything she has previously avoided ... and Jack must decide whether this funny, sassy girl is worth changing his life for, before his mistakes catch up to him. contemporary/romance/celebrity/hollywood/southern/sassy heroine/new adult

THE STORY: Locked in an office by an unseen producer, Hollywood veteran Manny McCain takes on the assignment of his life: to shape the sloppy opus of a gifted, guileless young writer into the next great crime noir. When Max and Thomas, two career c

Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, Reimagining Global Health provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout Reimagining Global Health bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history, among others.

RNA and Protein Synthesis is a compendium of articles dealing with the assay, characterization, isolation, or purification of various organelles, enzymes, nucleic acids, translational factors, and other components or reactions involved in protein synthesis. One paper describes the preparatory scale methods for the reversed-phase chromatography systems for transfer ribonucleic acids. Another paper discusses the determination of adenosine- and aminoacyl adenosine-terminated sRNA chains by ion-exclusion chromatography. One paper notes that the problems involved in preparing acetylaminoacyl-tRNA are similar to those found in peptidyl-tRNA synthesis, in particular, to the lability of the ester bond between the amino acid and the tRNA. Another paper explains a new method that will attach fluorescent dyes to cytidine residues in tRNA; it also notes the possible use of N-hydroxysuccinimide esters of dansylglycine and N-methylanthranlic acid in the described method. One paper explains the use of membrane filtration in the determination of apparent association constants for ribosomal protein-RNS complex formation. This collection is valuable to bio-chemists, cellular biologists, micro-biologists, developmental biologists, and investigators working with enzymes.
