Why exactly is Paul Revere revered? Was the lightbulb really Thomas Edison's bright idea? * Best-selling author Leland Gregory employs his masterful wit to expose historical myths, faux "facts," strange events, and tales of human stupidity throughout history. If it would shock you to learn that Benjamin Franklin didn't discover electricity, you'll appreciate this take on hundreds of historical legends and debacles. Historians and humorists alike may be surprised to learn that: * Samuel Prescott made the famous horseback ride into Concord, not Paul Revere. * As a member of Parliament, Isaac Newton spoke only once. He asked for an open window. * On April 24, 1898, Spain declared war on the U.S., thus starting the Spanish-American War. The U.S. declared war the very next day, but not wanting to be outdone, had the date on the declaration changed from April 25 to April 21. With these and many other stories, leading humorist Leland Gregory once again highlights both the strange and the funny side of humankind.

one of the "good guys," to stay home and parent the babies they've made, and to follow the dream rather than some dreamboat. Above all, she exhorts women not to blame anybody or anything but themselves if they're unhappy and their lives seem a mess. *10 Stupid Things Women Do to Mess Up Their Lives* uses real-world examples from Schlessinger's radio show and private practice to drive the message home. And the message is that our reticence to be bold and brave often makes us act like stupid, submissive victims. Once we muster the courage to take responsibility for our own problems and to tolerate the discomforts of risk, the possibilities for personal growth and joy are limitless. If you're looking for an all-approving hand to hold, you won't find it here. If you're prepared to take a clear-eyed look at your self-diminishing behavior and to make the move to a quality existence, there's no one better than Schlessinger to keep you honest and to cheer you on. One thing's for sure: You'll never look at your relationships, behaviors and decisions the same way after you've finished reading this book.
