Subsea technology in offshore oil and gas production is a highly specialized field of application with particular demands on engineering and simulation. Most of the new oil fields are located in deep water and are generally referred to as deepwater systems.

Subsea (technology) - Wikipedia

Subsea 7 From Wikipedia, the free encyclopedia Subsea 7 S.A. is a Luxembourgish-domiciled subsea engineering, construction and services company serving the offshore energy industry. The company is registered in Luxembourg with its headquarters in London.

Subsea 7 - Wikipedia

From Wikipedia, the free encyclopedia (Redirected from Subsea pipeline) A submarine pipeline (also known as marine, subsea or offshore pipeline) is a pipeline that is laid on the seabed or below it inside a trench. In some cases, the pipeline is mostly on-land but in places it crosses water expanses, such as small seas, straits and rivers.

Submarine pipeline - Wikipedia

Offshore geotechnical engineering is a sub-field of geotechnical engineering. It is concerned with foundation design, construction, maintenance and decommissioning for human-made structures in the sea. Oil platforms, artificial islands and submarine pipelines are examples of such structures.

Offshore geotechnical engineering - Wikipedia

History The integration of Cameron subsea section and Schlumberger-owned Framo Engineering in 2013 formed Onesubsea as a 60% Cameron and 40% Schlumberger joint venture. This cooperation, finally led to major acquisition of Cameron and Onesubsea in a \$14.8 billion deal in late 2015.

OneSubsea - Wikipedia

Subsea Innovation ' s Engineering Department offers technical and marine engineering services for any project specific requirement from concept design to the delivery of complete turnkey projects. All engineering design is performed on Autodesk Inventor and other design packages can be subjected to third party design verification.

Bespoke Engineering Solutions - subsea.co.uk

Subsea engineering, called marine or seabed-to-surface engineering, is a specialty job that deals with underwater projects. A subsea engineer generally designs and installs underwater structures, including oil well rigging, wellheads, and pipelines.

What does a Subsea Engineer do? (with pictures)

This Subsea Engineering degree is designed for Engineers with some relevant offshore oil and gas experience, and high-calibre graduates who wish to enhance their employability in the subsea industry.

Subsea Engineering Course with MSc Degree | RGU University -

The MSc Subsea Engineering is widely regarded as one of the best programmes of its kind in the UK. The programme is designed to prepare highly trained engineers for industry, by focusing on the fundamental skills and technical knowledge that are in demand by the subsea sector today.
