GS500E (1989-2002)

Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer.

GSX-R600 (1997-2000)

This is the book for the motorcyclist who wants to do it right! The Motorcycle Safety Foundation's Guide to Motorcycling Excellence is the most complete and authoritative guide to motorcycle safe-riding techniques and strategies. More than one million students have completed courses developed by the Motorcycle Safety Foundation, and this book is the culmination of what this leading rider-training organization has learned about teaching students of all ages and experience levels. It is the perfect refresher for anyone who has taken an MSF class and it will be an eye-opener for those who have not yet taken a formal training course. In a clear, engaging style with detailed diagrams and extensive full-color photographs and illustrations, the book covers rider attitude, proper gear, basic and advanced street skills, and performance, as well as skill maintenance and troubleshooting. Topics include how to stop quickly when necessary; avoiding traffic hazards; applying evasive maneuvers; countersteering for better control; traveling safely and skillfully in a group; identifying and fixing mechanical problems; riding smoothly at high and low speeds; maintaining momentum in off-highway riding; and much, much more. The Motorcycle Safety Foundation's Guide to Motorcycling Excellence is a remarkable source of riding wisdom and the definitive reference for the sport.

ing damage ranged from odor. to general visual appearance. Attributes of seedling quality are categorized as either to cutting buds. to scraping bark to detect dead cambium. performance attributes (RGP. frost hardiness. stress resistance) One nursery reported using frost hardiness as an indicator of or material attributes (bud dormancy. water relations. nutrition. when to begin fall lifting. but none reported using it as an morphology). Performance attributes are assessed by placing indicator of seedling quality before shipping stock to customers. samples of seedlings into specified controlled environments and evaluating their responses. Although some effective short 23.4.3 Stress resistance cut procedures are being developed. performance tests tend Only three nurseries measure stress resistance. They use to be time consuming; however, they produce results on whole the services of Oregon State University and the test methods plant responses which are often closely correlated with field described in 23.2.3. One nursery reported that results of stress performance. Material attributes. on the other hand. reflect tests did not agree well with results of RGP tests and that RGP only individual aspects of
