I got into medical school by saying I was black. I lied. Honestly, I am about as black as my sister Mindy Kaling (The Office / The Mindy Project).Once upon a time, I was an ethically challenged, hard-partying Indian American frat boy enjoying my third year of college. That is until I realized I didn't have the grades or scores to get into medical school. Legitimately. Still, I was determined to be a doctor and discovered that affirmative action provided a loophole that might help. The only problem? I wasn't a minority. So I became one. I shaved my head, trimmed my long Indian eyelashes, and applied as an African American. Not even my frat brothers recognized me. I joined the Organization of Black Students and used my middle name, Jojo. Vijay, the Indian American frat boy, became Jojo, the African American affirmative action applicant.Not everything went as planned. During a med school interview, an African American doctor angrily confronted me for not being black. Cops harassed me. Store clerks accused me of shoplifting. Women were either scared of me or found my bald black dude look sexually mesmerizing. What started as a scam to get into med school turned into a twisted social experiment that taught me lessons I would never have learned in the classroom.I became a serious contender at some of America's greatest schools, including Harvard, Wash U, UPenn, Case Western, and Columbia. I interviewed at 11 schools while posing as a black man. After all that, I finally got accepted into medical school.Before I finished this book, I stirred a hornet's nest by telling my story. It has been featured in more than 100 media outlets, including CNN, NBC, TIME, FOX, and Huffington Post. Many loved it, but not everyone approved of what I did. My college classmate Tucker Max (I Hope They Serve Beer in Hell) disapproved. My sister Mindy Kaling furiously declared, "This book will bring shame on our family!"I disagree but I'll let you be the judge.

Napalm was invented on Valentine's Day 1942 at a secret Harvard war research laboratory. It created an inferno that killed over 87,500 people in Tokyo—more than died in the atomic explosions at Hiroshima or Nagasaki—and went on to incinerate 64 Japanese cities. The Bomb got the press, but napalm did the work. Robert Neer offers the first history.

Cerebral vasospasm remains a major clinical problem in patients with subarachnoid hemorrhage. Neuroprotection with calcium antagonists, hemodynamic therapy and interventional angioplasty have an established role in the management of this disease, but an effective single drug for prevention or treatment of the vasospasm is still lacking. This book contains selected contributions to the 7th International Conference on Cerebral Vasospasm held in Interlaken, Switzerland, in June 2000. Part I of the book concentrates on basic science and experimental vasospasm. The molecular biology of vasospasm, the role of endothelin and nitric oxide as well as the potential of gene therapy are presented. Part II concentrates on the diagnosis and therapy of clinical vasospasm. New diagnostic tools are presented, including diffusion and perfusion-weighted MRI, MR spectroscopy and microdialysis with metabolic monitoring. Leaders in the field discuss the current indications and results of endovascular treatment of cerebral vasospasm. The latter chapters are devoted to the treatment of clinical vasospasm with new drugs and to the prevention and treatment of ischemic deficits with neuroprotective drugs and hemodynamic therapy. The book provides the state-of-the-art in the major subjects of the molecular biology of vasoconstriction and experimental vasospasm as well as the diagnosis and treatment of clinical vasospasm.

Traditional narratives on strategic management no longer fulfil the needs of students, practitioners, consultants and business owners operating within contemporary society. This textbook provides a differentiated approach to the topic, highlighting the dichotomy between theory and practice, and guiding readers towards an understanding of the future of strategic management. Moving beyond the short-sighted goal of profit maximization, Contemporary Issues in Strategic Management shines a light on measures that really matter, such as value. A wealth of global examples provide an illustration of competitive advantage from market-based and state-based perspectives, giving an insight into the activities that lead to the formation of successful and unsuccessful strategies. Written by two distinguished scholars in the field, this global textbook is essential reading for postgraduate students of strategic management worldwide.

The next in Alan Axelrod's engaging and popular CEO series spotlights a perfect subject: Napoleon, the brilliant military strategist who also laid the administrative and judicial foundations for much of Western Europe. Axelrod looks at this much-studied figure in a new way, exploring six areas that constitute the core of what made Napoleon a great leader: Audacity, Vision, Empathy, Strategy, Logistics, and Tactics. Within these areas Axelrod formulates approximately 60 lessons framed in military analogies, valuable for anyone who aspires to leadership, whether in the boardroom or the Oval Office.

For more than thirty years, the architectural research department at Colonial Williamsburg has engaged in comprehensive study of early buildings, landscapes, and social history in the Chesapeake region. Its painstaking work has transformed our understanding of building practices in the colonial and early national periods and thereby greatly enriched the experience of visiting historic sites. In this beautifully illustrated volume, a team of historians, curators, and conservators draw on their far-reaching knowledge of historic structures in Virginia and Maryland to illuminate the formation, development, and spread of one of the hallmark building traditions in American architecture. The essays describe how building design, hardware, wall coverings, furniture, and even paint colors telegraphed social signals about the status of builders and owners and choreographed social interactions among everyone who lived or worked in gentry houses, modest farmsteads, and slave quarters. The analyses of materials, finishes, and carpentry work will fascinate old-house buffs, preservationists, and historians alike. The lavish color photography is a delight to behold, and the detailed catalogues of architectural elements provide a reliable guide to the form, style, and chronology of the region's distinctive historic architecture.
