Northrop ' s T-38 Talon was the world ' s first supersonic trainer aircraft, and remains in service today in air forces worldwide. It entered service in 1961, and quickly set climb records, earning it the nickname ' white rocket ' . Nearly 1200 Talons were produced before the last one rolled off the assembly line in 1972. Capable of a speed of Mach 1.3, and a climb rate approaching 34,000 feet per minute, the T-38 ' s performance was sufficient to warrant service as the USAF Thunderbirds ' aircraft in the mid-1970s. Its primary role however, was as a dedicated training and proficiency platform. More than 50,000 USAF, NASA and NATO pilots have flown the Talon, a record that may never be matched. Originally printed by the U.S. Air Force and Northrop, this handbook for the T-38 provides a fascinating glimpse inside the cockpit of this famous aircraft. Originally classified ' restricted ' , the manual was recently declassified and is here reprinted in book form.
