This is an instructional guide to the art of botanical illustrations, published in association with The Society of Botanical Artists and featuring step-by-step work by members of the society.

Botanical and scientific illustration share many common themes - the meticulous observation, the crucial composition, the precision of rendering and the accuracy of colour are all intrinsic to this niche genre of art. In this beautiful book, Sarah Jane Humphrey explains the techniques of the botanical artist but also introduces ideas for scientific illustration, so that the illustrator has a fuller understanding when rendering the natural world. Detailed instruction on all aspects of illustration is given, from application and materials to research and field trips. There is practical advice on using monochrome and colour theory to bring your illustration to life. Illustrated with over 200 of the author's exquisite illustrations, it is an invaluable companion for both beginners and experienced artists, as well as a source of inspiration and joy. Beautifully illustrated with 429 colour illustrations including 200 of the author's own illustrations.

Highlighting an enduring interest in natural history from the 16th century to the present, this gorgeous book explores depictions of the natural world, from centuries-old manuscripts to contemporary artists' books. It examines the scientific pursuits in the 18th and 19th centuries that resulted in the collecting and cataloguing of the natural world. It also investigates the aesthetically oriented activities of self-taught naturalists in the 19th century, who gathered flowers, ferns, seaweed, feathers, and other naturalia into albums. Examples of 20th- and 21st-century artists' books, including those of Eileen Hogan, Mandy Bonnell, and Tracey Bush, broaden the vision of the natural world to incorporate its interaction with consumer culture and with modern technologies. Featuring dazzling illustrations, the book itself is designed to evoke a fieldwork notebook, and features a collection pocket and ribbon markers.

"Kew is eminent worldwide in botanical science and preservation, and Christabel King is their foremost botanical artist. Here she explains botanical art and illustration, covering materials, collecting plant material, drawing and painting techniques, magnification, and painting leaves, flowers, cacti and succulents, wildflowers, trees and plates for Curtis's Botanical magazine."--

Welcome to the museum! There are more than 160 animal specimens to be discovered in Animalium, the first in a series of virtual museums. Wander the galleries - open 365 days a year - and discover a collection of curated exhibits on every page, accompanied by informative text. Each chapter features a different branch of the tree of life, from the simple sponge to the enormous elephant.

The Art of Botanical & Bird Drawing Demonstration: An Artist's Guide to Natural Realist Flora , Fauna, and Botanical Scenes

This oversized collector's edition showcases antique paintings and drawings of birds and animals from the most important natural history collection in France. An unparalleled collection of the most beautiful--yet scientific--depictions of flora and fauna ever produced, these artworks document three centuries of exploration of the far reaches of the world--a

rich visual record harking back to a time when science relied upon painstaking human illustration as the only way to record exotic plants and unknown animals observed during voyages of discovery. All the artworks included here were depicted on vellum, a high-quality, long-lasting parchment that fell out of use around 1900 when it was supplanted by photography. France's national collection consists of over 7,000 such artworks and is among the world's finest. Flora and fauna from every corner of the globe are represented in precisely rendered color and detail. Sadly, many of the species depicted in these masterful yet hauntingly accurate portraits are now endangered, threatened--or in many cases, already extinct. This volume is both a celebration of the human quest for knowledge and an epitaph for a fast disappearing world--as well as a feast for the eyes for anyone who loves birds or vintage natural history art. This exquisite and timeless book is beautifully presented in a jacketed volume within a slipcase and luxuriously packaged within an illustrated mailer with a handle for portability.
