At some point in the course of evolution—“from a primeval social organization of early hominids—“all human societies, past and present, would emerge. In this account of the dawn of human society, Bernard Chapais shows that our

# File Type PDF The Bond Our Kinship With Animals

knowledge about kinship and society in nonhuman primates supports, and informs, ideas first put forward by the distinguished social anthropologist, Claude Lévi-Strauss. Chapais contends that only a few evolutionary steps were required to bridge the gap between the kinship structures of our closest relatives—chimpanzees and bonobos—and the human kinship configuration. The pivotal event, the author proposes, was the evolution of sexual alliances. Pair-bonding transformed a social organization loosely based on kinship into one exhibiting the strong hold

# File Type PDF The Bond Our Kinship With Animals

of kinship and affinity. The implication is that the gap between chimpanzee societies and pre-linguistic hominid societies is narrower than we might think. Many books on kinship have been written by social anthropologists, but Primeval Kinship is the first book dedicated to the evolutionary origins of human kinship. And perhaps equally important, it is the first book to suggest that the study of kinship and social organization can provide a link between social and biological anthropology.

Is there a universal language of love, a "kinship

with all life" that can open new horizons of experience? Example after example in this unique classic -- from "Strongheart" the actor-dog to "Freddie" the fly -- resounds with entertaining and inspiring proof that communication with animals is a wonderful, indisputable fact. All that is required is an attitude of openness, friendliness, humility, and a sense of humor to part the curtain and form bonds of real friendship. For anyone who loves animals, for all those who have ever experienced the special devotion only a pet can bring, Kinship With All Life is an unqualified delight.

Two sisters grow up a world apart—one in war-torn Korea, the other in America—in this "finely wrought novel" by the author of *The Calligrapher's Daughter* (Publishers Weekly). In 1948 Najin and Calvin Cho, with their young daughter Miran, travel from South Korea to the United States in search of new opportunities. Wary of the challenges they will face, Najin and Calvin leave their infant daughter, Inja, behind with their extended

family; soon, they hope, they will return to her. But then war breaks out in Korea, and there is no end in sight to the separation. Miran grows up in prosperous American suburbia, under the shadow of the daughter left behind, as Inja grapples in her war-torn land with ties to a family she doesn't remember. Najin and Calvin desperately seek a reunion with Inja, but are the bonds of love strong enough to reconnect their family over distance, time, and war? And as deep family secrets are revealed, will everything they long for be upended? Told through the alternating perspectives of the

distanced sisters, and inspired by a true story, *The Kinship of Secrets* explores the cruelty of war, the power of hope, and what it means to be a sister. "A gorgeous achievement." —Min Jin Lee, author of *Pachinko*

A major new exploration of the economics of animal exploitation and a practical roadmap for how we can use the marketplace to promote the welfare of all living creatures, from the renowned animal-rights advocate Wayne Pacelle, President/CEO of the Humane Society of the United States and New York Times bestselling author of *The Bond*. In the mid-

nineteenth century, New Bedford, Massachusetts was the whaling capital of the world. A half-gallon of sperm oil cost approximately \$1,400 in today's dollars, and whale populations were hunted to near extinction for profit. But with the advent of fossil fuels, the whaling industry collapsed, and today, the area around New Bedford is instead known as one of the best places in the world for whale watching. This transformation is emblematic of a new sort of economic revolution, one that has the power to transform the future of animal welfare. In *The Humane Economy*, Wayne

# File Type PDF The Bond Our Kinship With Animals

Wayne Pacelle, President/CEO of the Humane Society of the United States, explores how our everyday economic decisions impact the survival and wellbeing of animals, and how we can make choices that better support them. Though most of us have never harpooned a sea creature, clubbed a seal, or killed an animal for profit, we are all part of an interconnected web that has a tremendous impact on animal welfare, and the decisions we make—whether supporting local, not industrial, farming; adopting a rescue dog or a shelter animal instead of one from a “puppy mill”;

# File Type PDF The Bond Our Kinship With Animals

avoiding products that compromise the habitat of wild species; or even seeing Cirque du Soleil instead of Ringling Brothers—do matter. The Humane Economy shows us how what we do everyday as consumers can benefit animals, the environment, and human society, and why these decisions can make economic sense as well.

Kinship care - the care of children by grandparents, other relatives or friends - is a major part of foster care, yet there are distinct issues that arise in care involving family rather than 'stranger' foster carers. This book takes an in-depth

# File Type PDF The Bond Our Kinship With Animals

Look at what goes on 'inside' kinship care. It explores the dynamics and relationships between family members that are involved in kinship care, including mothers, grandparents, siblings and the wider family. Chapters also discuss issues such as safeguarding, assessment, therapy, encouraging permanence, placement breakdown, support groups, and cultural issues. The final part of the book looks at kinship care from an international perspective, with examples from New Zealand, Australia, South Africa and the United States. Drawing on a range

# File Type PDF The Bond Our Kinship With Animals

of theoretical perspectives and with contributions from different branches of kinship care, this book provides an invaluable overview of the issues involved and how to provide effective support. It will be essential reading for all those working in the kinship care field, including social workers, therapists, counsellors, psychologists and family lawyers.

Kinship to Mastery is a fascinating and accessible exploration of the notion of biophilia -- the idea that humans, having evolved with the rest of creation, possess a biologically based

# File Type PDF The Bond Our Kinship With Animals

attraction to nature and exhibit an innate affinity for life and lifelike processes. Stephen R. Kellert sets forth the idea that people exhibit different expressions of biophilia in different contexts, and demonstrates how our quality of life in the largest sense is dependent upon the richness of our connections with nature. While the natural world provides us with material necessities -- food, clothing, medicine, clean air, pure water -- it just as importantly plays a key role in other aspects of our lives, including intellectual capacity,

# File Type PDF The Bond Our Kinship With Animals

emotional bonding, aesthetic attraction, creativity, imagination, and even the recognition of a just and purposeful existence. As Kellert explains, each expression of biophilia shows how our physical, material, intellectual, emotional, and spiritual well-being is to a great extent dependent on our relationships with the natural world that surrounds us. Kinship to Mastery is a thought-provoking examination of a concept that, while not widely known, has a significant and direct effect on the lives of people everywhere. Because the full expression

# File Type PDF The Bond Our Kinship With Animals

of biophilia is integral to our overall health, our ongoing destruction of the environment could have far more serious consequences than many people think. In a readable and compelling style, Kellert describes and explains the concept of biophilia, and demonstrates to a general audience the wide-ranging implications of environmental degradation. Kinship to Mastery continues the exploration of biophilia begun with Edward O. Wilson's landmark book Biophilia (Harvard University Press, 1984) and followed by The Biophilia Hypothesis (Island Press, 1993), co-edited by Wilson

and Kellert, which brought together some of the most creative scientists of our time to explore Wilson's theory in depth.

"The Bond" is a powerful memoir that chronicles the strength of the relationships formed among a collection of unrelated siblings who forged a remarkable, separate, and permanent family within a foster home. Kirkus.com calls it: "A poignant, infuriating, informative, and ultimately triumphant account of an unusual clan." BookLife.com wrote: "Grotticelli's unsparing honesty about his birth and

indomitability of these children. That the foster siblings were able to forge familial bonds with each other is extraordinary."

OnlineBookClub.com said:

"This is a book about real people, real lives and real feelings. It is the story of their triumph over adversity and their struggle to find the kind of family love that many of us take for granted." Angelo M.

scholarship and creative narration, Lisa Brooks recovers a complex picture of war, captivity, and Native resistance during the "First Indian War" (later named King Philip's War) by relaying the stories of Weetamoo, a female Wampanoag leader, and James Printer, a Nipmuc scholar, whose stories converge in the captivity of Mary Rowlandson. Through both a narrow focus on Weetamoo, Printer, and their network of relations, and a far broader scope that includes vast Indigenous geographies, Brooks leads us to a new understanding of the history of colonial New England and

of American origins. In reading seventeenth-century sources alongside an analysis of the landscape and interpretations informed by tribal history, Brooks's pathbreaking scholarship is grounded not just in extensive archival research but also in the land and communities of Native New England."--Jacket flap.
