Cosmic landscape : string theory and the illusion of ...

The string theory landscape or landscape of vacua refers to the collection of possible false vacua in string theory, together comprising a collective "landscape" of choices of parameters governing compactifications. The term "landscape" comes from the notion of a fitness landscape in evolutionary biology. It was first applied to cosmology by Lee Smolin in his book *The Life of the Cosmos*, and was first used in the context of string theory by Leonard Suskind.
