Sun Yatsen (1866-1925) occupies a unique position in modern Chinese history: he is equally venerated as the founding father of the nation by both the mainland Communist government and its Nationalist rival in Taiwan. The first president of the Republic of China in 1911-12, the peasant-born yet Western-trained Dr Sun was also a dedicated political theorist, constantly in search of the ideal political and constitutional blueprint to underpin his incomplete revolution. A decade before the public emergence in Japan of his 'Three Principles of the People', and weeks before even his first slim publication in 1897, Kidnapped in London, Sun was already hard at work in the Reading Room of the British Museum, planning his most ambitious book yet: a comprehensive political treatise in English on the tyrannical misgovernment of the Chinese nation by the Manchus of the Qing Dynasty. Started then abandoned twice over, destined never to be completed, let alone published, we can only conjecture what title this

revolutionary book might have had. The Lost Book of Sun Yatsen and Edwin Collins is the first study of this lost work in all scholarship, Western or Chinese. It draws its originality and its themes from three primary sources, all presented here for the first time. The first is a series of interconnected lost writings co-authored by Sun Yatsen between 1896 and 1898. The second is the mass of lost political interviews with, and articles dedicated to, Sun Yatsen and his politics, first published in the British press in the aftermath the dramatic world-famous rescue of Sun from inside the Chinese Legation in London in 1896. The third source is the 'Apostle of the Simple Life for Children', the Anglo-Jewish Rabbi Edwin Collins (1858-1936), a devotee and practitioner of Jean-Jacques Rousseau's Émile and the New Education movement it inspired, who became Sun's writing collaborator of choice during his years of political exile from China. Drawing on this wealth of neglected material, Patrick Anderson's book offers a genuinely fresh perspective on Sun Yatsen and his political motivations and beliefs.

This is a collection of interviews with 26 writers of China's "zhiqing" generation, relatively young artists who participated in the Cultural Revolution as teen-age Red Guards, suffered through the subsequent rustication of intellectual youth, and eventually returned to relatively normal lives, but always with a tragic hiatus haunting their formative years. While one goal of Professor Leung is to introduce to the West an important group of writers little-known outside China, she also aims to succeed, through the interviews, in providing a special perspective on the devastating political history of China since the 1970s years through the eyes of its keenest observers and in offering a perspective on the social, political and cultural milieu of the period.

Based on extensive research, this book chronicles the story of the only person who, after playing successfully in baseball's Major Leagues, was drafted by the American military and served with honor and distinction in the Vietnam War. According to baseball and military records--including various accounts and articles--Roy Gleason is "the

only one." Why was this fantastic prospect the only man among thousands of others with major league experience sent into the front lines of combat in Southeast Asia? Perhaps more startling, how did those men avoid this fate? Even Gleason didn't know the answer for more than 40 years until a detailed four-year investigation shed light on the situation. What he learned was shocking. Gleason signed his first professional contract with what was reported to be a six-figure signing bonus. In today's market, that would be worth several million dollars. His career was remarkable and he boasts a career batting average of 1.000 (no one in MLB history, living or dead, matches this mark). He also enjoyed a brief career in film and television, highlighted in the book. Was it merely bad luck that placed Gleason into a war? Was it unfortunate circumstances? After being severely wounded, did he recover to play again? Why didn't he play more, especially with a perfect record at the plate? Roy Gleason's life is an endless list of questions that have gone unanswered--until now. *Lost in the Sun* is narrated from Gleason's point of view, and opens with a near-fatal experience he endured in a Vietnamese jungle. Providing a first-hand account, he shares tales of how the human mind works when death is all that surrounds it. Throughout each chapter, readers will meet the man wholeft potential success on the playing fields of Major League Baseball for the killing fields of Vietnam. This humble man recognizes, however, that he was "only one of thousands who were sent so far away from home, to that place none of us wanted to go and that place where many never left and that place where we were all lost in the sun."

Settle in for a thrill-a-minute journey to the land of the ancient Incans in H. Rider Haggard's novel *The Virgin of the Sun*. An antique dealer whose life is thrown into disarray by a sudden tragedy sets off for the adventure of a lifetime -- and along the way finds a romance that begins to heal his hardened heart.

From her place in the store, Klara, an Artificial Friend with outstanding observational qualities, watches carefully the behaviour of those who come in to browse, and of those who pass in the street outside. She remains hopeful a customer will soon choose her, but when the possibility emerges that her circumstances may change for ever, Klara is warned not to invest too much in the promises of humans. In *'Klara and the Sun'*, Kazuo Ishiguro looks at our rapidly-changing modern world through the eyes of an unforgettable narrator to explore a fundamental question: what does it mean to love?
