nurses, pharmacists, midwives, doctors, and paramedics – to quickly access the current procedures for dealing with situations they are likely to encounter in their daily practice.

This fully revised third edition provides research-based protocols enabling nurses to manage a wide range of conditions based upon up-to-date research.

The authors have described the most frequently encountered complaints and disorders that do not pose a serious health threat, often have a good prognosis and have not been paid much attention during medical education or in scientific papers. The basic principle is to provide relevant information on minor ailments, based on scientific evidence.

An ability to recognise symptoms of serious illness is essential for all front-line professionals in health care. Presented here are the red flag indicators of major disease in need of urgent intervention and the amber flag warnings of a need for urgent assessment. Each is linked to a reason why intervention is required to aid understanding and recall. The Little Book of Red Flags is a practical handbook to help early diagnosis of life-threatening conditions. The authors, Dr Ian Hill-Smith MD MRCP FRCGP and Dr Gina Johnson MB BS MSc MRCGP are highly experienced GP's who run accredited diploma courses in urgent care and are co-authors, along with their colleague Dr Chirag Bakhai, of the best-selling Minor Illness Manual, now in its 5th edition.
