Incorruptibility is a Roman Catholic and Eastern Orthodox belief that divine intervention allows some human bodies (specifically saints and beati) to avoid the normal process of decomposition after death as a sign of their holiness. Bodies that undergo little or no decomposition, or delayed decomposition, are sometimes referred to as incorrupt or incorruptible.

How much did the theological arguments of the church affect the copying of the New Testament text? Focusing on issues of textual criticism, this inaugural volume of the Text and Canon of the New Testament series offers some answers to that question and responds to some of Bart Ehrman's views about the transmission of the New Testament text. Revisiting the Corruption of the New Testament will be a valuable resource for those working in textual criticism, patristics, and New Testament apocryphal literature.

When world-class biblical scholar Bart Ehrman first began to study the texts of the Bible in their original languages he was startled to discover the multitude of mistakes and intentional alterations that had been made by earlier translators. In *Misquoting Jesus*, Ehrman tells the story behind the mistakes and changes that ancient scribes made to the New Testament and shows the great impact they had upon the Bible we use today. He

frames his account with personal reflections on how his study of the Greek manuscripts made him abandon his once ultraconservative views of the Bible. Since the advent of the printing press and the accurate reproduction of texts, most people have assumed that when they read the New Testament they are reading an exact copy of Jesus's words or Saint Paul's writings. And yet, for almost fifteen hundred years these manuscripts were hand copied by scribes who were deeply influenced by the cultural, theological, and political disputes of their day. Both mistakes and intentional changes abound in the surviving manuscripts, making the original words difficult to reconstruct. For the first time, Ehrman reveals where and why these changes were made and how scholars go about

reconstructing the original words of the New Testament as closely as possible. Ehrman makes the provocative case that many of our cherished biblical stories and widely held beliefs concerning the divinity of Jesus, the Trinity, and the divine origins of the Bible itself stem from both intentional and accidental alterations by scribes -- alterations that dramatically affected all subsequent versions of the Bible.

Forgery and Counter-forgery: The Use of Literary Deceit in Early Christian Polemics is the first major contemporary work on forgery in early Christian literature. It examines the motivation and function behind Christian literary forgeries.

Beginning with Walter Bauer in 1934, the denial of clear orthodoxy in early Christianity has shaped and largely defined modern New Testament criticism, recently given new life through the work of spokesmen like Bart Ehrman. Spreading from academia into mainstream media, the suggestion that diversity of doctrine in the early church led to many competing orthodoxies is indicative of today's postmodern relativism.

Authors Köstenberger and Kruger engage Ehrman and others in this polemic against a dogged adherence to popular ideals of diversity.

Köstenberger and Kruger's accessible and careful scholarship not only counters the "Bauer Thesis" using its own terms, but also engages overlooked evidence from the New
