Abstract and Keywords. Philosophers in eighteenth-century Britain had a keen interest in human nature, and made great strides in developing more scientific conceptions of human nature by borrowing and adapting the methods from natural history and natural philosophy. Human nature was analyzed at the level of the individual: how to cultivate a moral sense, or a more refined taste with respect to beauty.

However, the science does indicate important innate differences. Men like to criticize women for being too "choosey" about mates, but the evolutionary implications are clear that promiscuity is a losing evolutionary strategy. Females of many species are quite choosey about mates for good reason: it helps ensure survival.
