Dr. Steven Kussin, physician and a pioneer in the Shared Decision movement, takes readers through the steps of how to avoid the many pitfalls of unnecessary and sometimes even dangerous medical care. The American healthcare system is subsidized by its services to healthy people. The goal as it is for any business is to encourage people to become consumers by creating an emotionally-fueled demand for things that are suddenly and urgently needed. It ' s hard to make healthy people well; it ' s easy to make them sick. Under the goal to make you even healthier, the medical industry identifies and encourages investigations and preventive technologies for ' problems ' unlikely to occur, unlikely to harm, unlikely to benefit from testing, and, once diagnosed, unlikely to benefit from treatment. Profitable services go on indefinitely for those who are young and well. For the health care industry being in good health is not just the best way to live; good health is also the slowest way to die. Many people find themselves on what the author calls the Slippery Slope, experiencing a cascade of escalating misfortunes produced by more tests with incrementally greater risk, expense, and fewer benefits. Many people, who, in the attempt to improve what is already just fine, unquestioningly pay an immediate and visible price for what are distant, invisible, and uncertain benefits. The central starting point for initiating a Slippery Slope adventure can be the first blood test, the first screening test, the first x-ray, the first pill, or the first diagnosis that ' s accepted by unwitting and trusting consumers. The bottom of the Slippery Slope is occupied by those previously well but who now are damaged, and by others who suffered needless unscheduled deaths. America ' s famed consumer skepticism when judging retail products is curiously and dangerously absent in their interactions within the healthcare system. Here, Steven Kussin offers strategies that give readers knowledge and power by offering unique perspectives, information, and resources. He confronts the mighty forces arrayed against health care consumers and helps readers learn to identify them themselves. The power of money, the authority of science, the stature of physicians, the lure of elective health ' improvements ' , the promise of technology, and the pitch perfect, perfect pitches of televised ads all conspire to push people in directions that are often at odds with their stated priorities and interests. This book is dedicated to one lesson: The view from atop the Slope, before making a health care decision, is better than the view from the bottom, after having made a bad one.

Slippery Slope is far from the usual run of uncritical EU-related studies. Its aim is to set alarm bells ringing across Europe with its revealing insights into our increasingly troubled future. Giles Merritt argues that the steepness and suddenness of Europe's decline in the 'Asian century' will depend on the actions we Europeans undertake. And there are two key lessons that we need to face from the beginning. Firstly, the 'good times' aren't coming backwithout a massive effort on our part. And secondly, in a fast-developing world of 9-10 billion people, no single European country can survive and prosper on its own.Merritt sets out tosort fact from fiction in his analysis of Europe's weaknesses, and the policies needed to address them. Placing the outlook for Europe in its global context, he assesses Europe's decline in relative as well as absolute terms,

and puts forward an ambitious but realistic 'to do' list for Europe's policymakers if our comparatively privileged life styles are not to be seriously threatened in the coming years.
