The Theory of Catering (10th revised edition) 31 July 2003 by Joanna Wood. I have used this book continuously in my studies and professional career for some 23 years now, first buying a copy in 1980 in my first year of catering school, when attending Monkwearmouth College in Sunderland. Along with Practical Cookery, The Larder Chef and Le Repertoire de la Cuisine, The Theory of Catering was on my list of books to buy before even starting the course.

We develop a theory in which the decision to pay dividends is driven by investor demand. Managers cater to investors by paying dividends when investors put a stock price premium on payers and not paying when investors prefer nonpayers. To test this prediction, we construct four time series measures of the investor

I. A Catering Theory of Dividends The theory has three basic ingredients. First, it posits a source of uninformed investor demand for firms that pay cash dividends. Second, limits on arbitrage allow this demand to affect current share prices. Third, managers rationally weigh the short run benefits of catering to the current mispricing against the
