This book is the first detailed reconstruction of the late work of John Rawls. John Rawls is considered to be one of the most influential philosophers of the twentieth century. Well known for his writings as a political philosopher, Rawls also commented on economic and developmental psychology topics. His book A Theory of Justice has produced a considerable number of commentaries on Rawls' theory of "justice-as-fairness". In this volume Edmundson explores the generally accepted notion that Rawls was a defender of welfare-state capitalism as found in Western Europe and the United States. He points out that shortly before his death, Rawls expanded on what type of regime meet his criteria of a just state in his Justice as Fairness: A Restatement. Edmundson further develops Rawls' ideas on what our individual duties of justice are when we find ourselves in a society that falls short of justice and fairness.

The formation of galaxies is one of the greatest puzzles in astronomy, the solution is shrouded in the depths of space and time, but has profound implications for the universe we observe today. This book discusses the beginnings of the process from cosmological observations and calculations. It examines the different theories of galaxy formation and shows where each theory either succeeds or fails in explaining what we actually observe. In addition, the book looks ahead to what we may expect to uncover about the epoch of galaxy formation from the new and upcoming generations of telescopes and technology.

When Odessa Blackburn is three years old, she sees her grandmother for the last time, and so begins her story as the fifth born of eight children in a troubled family. Molested by her father, Odessa is also the sole witness to a murder he commits. Her mother guards both secrets and joins her husband in ostracizing their fifth born from the rest of her siblings. As Odessa grows, so do her troubles. She ultimately separates herself from her parents and siblings into a new reality that prompts memory and revelation. Her choices for survival provoke an outcome that will forever alter the carefully maintained lies of her childhood. Zelda Lockhart's Fifth Born is lyrically written, poignant and powerful in its exploration of how secrets can tear families apart and unravel people's lives. Set in rural Mississippi and St. Louis, Missouri, Fifth Born is a story of loss and redemption, as Odessa walks away from those who she believes to be her kin to discover the meaning of family.

When I was 22 I hopped a plane for New York City, off to pursue my destiny, sure that I'd never look back. This is my story of looking back. Of a journey that took on a whole new meaning and purpose. A year in New York City. A year of discovering the best and worst parts of myself. A year of learning the lessons that you can only learn the hard way.

Although there appears to be a general understanding that the human brain functions similarly in women and in men, an increasing body of knowledge indicates that neuronal connectivity, recruitment, and disease patterns exhibit gender differences. There are clear gender differences in genetic expression, physiologic function, metabolism, hormonal makeup, and psychosocial profile, which often modify the clinical expression of neurologic and other diseases. In addition, ethnic, cultural, and economic factors are frequently overlooked in dealing with health problems of women, even though they undoubtedly have a strong influence on the clinical course of the illness. The second edition of Neurologic Disease in Women, the only text to specifically cover this important topic, will help physicians and other medical personnel seeking information relevant to clinical care. Sections address general anatomic, hormonal, epidemiologic, and drug aspects of women's health; neurologic conditions that arise during childhood, pregnancy, adulthood, and old age in females; and particular neurologic conditions that present differently or predominantly in females. There have been important advances in several areas prompting new chapters, new approaches and additional information provided in chapters on hormonal effects in women and the use of HRT; the adverse effects of antiepileptic drugs on hormonal homeostasis, weight and bone health; and cardiovascular diseases in women. New chapters include ones on reproductive and metabolic disorders with AED use, and on movement disorders.

"Let's be honest: expat life can be tough. Although exciting, exhilarating and enriching, it can also be one of the greatest challenges you face. Get the tools you need to succeed in this guided journal, created by Trisha Carter (cross cultural psychologist), and Rachel Yates (expatriate resource developer). In a world where the rules are different, the environment unfamiliar and your support network far away, they will guide you through the process to a successful overseas relocation. Whether this is your first, your fourth or your final move, you too can find your home abroad." "Finding Home Abroad encourages you to get to know your new location from the inside out, leaving assumptions behind. This guide is a gem - don't leave home without it!" Apple Gidley Author, Expat Life Slice by Slice www.applegidley.com "A must-have personal resource for first-time international assignees and their accompanying partners, a great complementary tool for any cross-cultural trainer or coach, and an invaluable resource for expats." Anne-Claude Lambelet Intercultural Competence & Career Development Coach www.aclambelet-consulting.com "Rooted in research but written for practitioners, Finding Home Abroad will be a huge help to those who use it, as well as their families and organizations." In this provocative work, Virginia Milhouse demonstrates how autoethnography combines creative and analytical practices to help bring to consciousness some complex social and political agendas hidden in narratorial writings. It demonstrates how an arts-based qualitative research method (narrative inquiry) can be fused with a scientific-based quantitative method (DMIS-IDI) and compliment, support and or correct each other. It also demonstrates how "writing as a method of inquiry" can be a viable way for researchers to learn about themselves and their research, as well as features standards for evaluating creatively and analytically constructed text. Further, the author's examination of the aesthetics of "inner-readiness" and "in-betweeness" will be very helpful to people doing this kind of self-reflexive fieldwork. The reader will also appreciate this author's recognition of the importance of combining qualitative and quantitative methodologies--something not many writers can do with great success. Also, this book will be a real contribution to sojourners and others traveling or living abroad. The work is very smart; and, is, beautifully and clearly written. The ''labyrinth'' quote at the beginning of her work is very fitting and certainly promises to illustrate those words.
