Mikuni Carburetor Tuning. There is a large amount of horsepower to be found in a properly tuned carburetor. Unfortunately, there isn't a universal setup that will work with every engine combination. Jetting that works great with one engine may not work so well with another.

### Mikuni Carburetor Tuning – Affordable Go Karts

On most Mikuni stuff, setting the float arms to be parallel to the bowl gasket surface when the carb is inverted is a good starting point. If the level is too high, a tilted-towards-the-engine carb position, plus vibration, will make fuel dribble from the idle holes at the lower, engine-side edge of the slide, making the mixture rich and irregular.
