All 2post lifts require a continuous single slab. Spanning expansion seams or positioning posts on separate slabs is not acceptable. DO NOT install any BendPak lift on any surface other than concrete, conforming to the minimum compressive strength, aging, reinforcement, and thickness stated in the table above. ALL BENDPAK LIFTS MUST BE INSTALLED ON CONCRETE ONLY.

~~Two Post Lift Install—YouTube~~

Let's assume for installation purposes that the overall width on a two-post lift is 145 inches at the outside of base plates. That would be less than 1/8 inch of slope every foot. This floor could easily be perceived as a level floor. Your options would be as follows: Install the lift on the sloped floor and shim only as necessary to plumb the columns.
