To attend to a living child is to be baffled in your humour, disappointed of your pathos, and set freshly free from all the pre- occupations. You cannot anticipate him. Blackbirds, overheard year by year, do not compose the same phrases; never two leitmotifs alike. Not the tone, but the note alters. So with the uncovenated ways of a child you keep no tryst.

Preventing Nuclear War: The Medical and Humanitarian Case for the Prohibition of Nuclear Weapons provides a window into the work of the International Physicians for the Prevention of Nuclear War (IPPNW) health professionals, advocates and activists as they persuaded diplomats, parliamentarians, the media, and the public to ban nuclear weapons. Why are doctors speaking out about nuclear weapons and nuclear war, an issue that seems to be the exclusive province of diplomats, politicians, and security experts? This volume offers an answer in the unique perspective of health professionals on the nature of nuclear weapons, their medical and humanitarian consequences, and the responsibility to prevent what cannot be treated. On 7 July 2017, the UN successfully concluded negotiations on the Treaty on the Prohibition of Nuclear Weapons. The "ban treaty," emerged from a "humanitarian initiative" that shifted the focus away from deterrence-based rationales used by the nuclear-armed states and toward an evidence-based understanding of the existential threat nuclear weapons pose to humanity. Since 1980, IPPNW has been the leading medical organization primarily dedicated to the abolition of

nuclear weapons. With its civil society partners in ICAN—the International Campaign to Abolish Nuclear Weapons—IPPNW brought the scientific evidence about nuclear weapons and nuclear war into the treaty negotiations and into the language of the TPNW itself. The contributors to this volume show the dedication and diverse strategies that have together made up a unified and very significant contribution to ridding the world of nuclear weapons. Reflecting honestly on what has been learnt and have the potential to contribute to wider learning outside the anti-nuclear community, Preventing Nuclear War: The Medical and Humanitarian Case for the Prohibition of Nuclear Weapons will be of great use to medical and health professionals, humanitarian professionals, and anyone wanting to work towards a more peaceful and equitable world. The chapters originally published as a special issue of Medicine, Conflict and Survival.

This, the second edition of the BSAVA Manual of Canine and Feline Musculoskeletal Imaging, has been extensively updated reflecting the dramatic changes that have taken place in radiography over the past 10 years. With the increasing availability of digital radiography in general veterinary practice and a greater accessibility to cross-sectional imaging techniques the editors have included five new chapters covering the basics of the different imaging modalities with particular reference to their use in musculoskeletal imaging. Comparisons are drawn between the different techniques and a generous use of illustrations and images bring an example driven clarity and understanding to the written word. As in the previous edition, the manual is structured along anatomical lines and the updated chapters have all been expanded to include more ultrasound as well as CT, MRI and scintigraphy. The practical nature of the manual makes it ideal for use in general practice as well as being a rich source of information for students and newly qualified veterinary surgeons. However, the depth of information supplied by an international panel of authors makes the BSAVA Manual of Canine and Feline Musculoskeletal Imaging second edition a useful reference for orthopaedic surgeons and specialist radiologists. Additionally, there is an accompanying CD featuring video clips as well as all the images used throughout the manual.
