Valleylab™ Exchange User's Guide - UGAP

Electrocautery refers to direct current (electrons flowing in one direction) whereas electrosurgery uses alternating current. During electrocautery, current does not enter the patient ' s body. Only the heated wire comes in contact with tissue. In electrosurgery, the patient is included in the circuit and current enters the patient ' s body.

Principles of Electrosurgery

The Valleylab™ FX8 energy platform drives electrosurgical handpieces with precision using lower levels of energy. 1,2 It ' s designed to support a wide range of surgical procedures that require division, hemostasis, and dissection.
