SVN is a centralized version

# Access PDF Version Control With Subversion

control system. It's different from distributed systems, like Git.

Centralized version control means that the version history is stored in a central server. When a developer wants to make

# Access PDF Version Control With Subversion

changes to certain files,  
they pull files from that  
central server to their own  
computer. After the  
developer has made changes  
...
