A Day in the Life of the Vivitar 283. Bounce Flash off a Low Ceiling. Most indoor photos are taken in rooms with normal 8-10 foot Ceilings. In this environment, the 283's ASA 100 Guide Number of 120 is adequate to bounce the light off the Ceiling. In my opinion, this gives a much more natural and richer look to the image than the usual direct-flash, where the flash aims straight at the subject with all the flattering lighting quality of a headlight.
