This 'on/off' room thermostat can be used to adjust the set room temperature. It's ideal for the Vision C boiler, as the user can conveniently adjust their heating temperature without interfering with any programmed heating timings that have been set on the Vision C boiler's built-in seven-day digital clock. Also compatible with all other Vokera boilers where a simple room thermostat is required.

RF room thermostat control | Vokera

A programmable room thermostat gives you easy control over boiler heating timings and temperatures over a seven day period. Both RF (wireless) and hard-wired versions available to make it easy to install. Configured for use with the Compact A combi boiler, it's easy and quick to connect the receiver to the boiler using the Plug & Play Tyco socket. It's also compatible with all the current Vokera ranges.
