It was invented immediately after the war, in the factory a far-sighted English military man had set up to turn the German economy from making machines of warfare to more pacific products. By the seventies that dream had been amply fulfilled, as the VW Campervan became the conveyance of choice for West Coast hippies, Australian surf bums and Europeans taking the overland route to find enlightenment and good karma in India. It had also become – indeed, still is – the first choice for any couple, or family, seeking a cheap camping holiday with wheels attached. So never mind the oddly off-centre driving wheel, the vagaries of the aircooled rear engine – the VW Campervan had become more than a vehicle – it had truly become a way of life. Mike Harding's first ride in a Volkswagen Camper Van was back in 1961, when it was the carrying around the gear and bandmembers of his rock band the Manchester Rainmakers. Finally, in 2009, he could wait no longer, and bought his own, a 2001 Type 2 bay window Brazilian import Danbury conversion in hot orange and off white. Add in the endless curiosity of the author of eight monographs on church architecture, and the hilarious sense of humour of one of Britain's best stand-up comics, and you have a wonderful social history of the postwar years through the prism of a single transport icon.

Diamonds are a multi-billion dollar business involving some of the world's largest mining companies, a million and a half artisanal diggers, more than a million cutters and polishers and a huge retail jewellery sector. But behind the sparkle of the diamond lies a murkier story, in which rebel armies in Angola, Sierra Leone and the Congo turned to diamonds to finance their wars. Completely unregulated, so-called blood diamonds became the perfect tool for money laundering, tax evasion, drug-running and weapons-trafficking. *Diamonds* brings together for the first time all aspects of the diamond industry. In it, Ian Smillie, former UN Security Council investigator and leading figure in the blood diamonds campaign, offers a comprehensive analysis of the history and structure of today's diamond trade, the struggle for effective regulation and the challenges ahead. There is, he argues, greater diversification and competition than ever before, but thanks to the success of the Kimberley Process, this coveted and prestigious gem now represents a fragile but renewed opportunity for development in some of the world's poorest nations. This part of the diamond story has rarely been told.
