Rush Textbook Solutions for Accounting: What the Numbers Mean (10th Edition) provides a chapter-by-chapter selection of guided solutions prepared to offer widespread coverage for this specific textbook. Developed by subject matter experts and industry professionals our solutions offer original step-by-step guidance to help you through tough homework assignments and prepare you for difficult exams. Inside, you will find different solution types that range from open ended responses to worked-out problems and exercises. With many solution sets available, don't let yourself be frustrated with your homework. Rush Textbook Solutions are here to help you.

Designed for non-majors, Accounting: What the Numbers Mean, guides students through the basics: what accounting information is, how it is developed, how it is used, and what it means. Financial statements are examined to learn what they do and do not communicate, enhancing the student's decision-making and problem-solving abilities from a user perspective. This approach benefits a variety of non-accounting majors, including students focusing on other areas of business or nonbusiness programs such as engineering, behavioral sciences, public administration, or prelaw.

Introduction to Probability Models, Student Solutions Manual (e-only)

Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-series databases, text databases, the World Wide Web, and applications in several fields Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data

A comprehensive introduction to the tools, techniques and applications of convex optimization.

This book is the solution of Mathematics (R.D. Sharma) class 10th (Publisher Dhanpat Rai). It includes solved & additional questions of all the chapters mentioned in the textbook and this edition is for 2021 Examinations. Recommended for only CBSE students.

Solutions of ICSE Mathematics 10 (Das Gupta) Bharti Bhawan for 2021 Examinations

MATHEMATICAL EXCURSIONS, Third Edition, teaches students that mathematics is a system of knowing and understanding our surroundings. For example, sending information across the Internet is better understood when one understands prime numbers; the perils of radioactive waste take on new meaning when one understands exponential functions; and the efficiency of the flow of traffic through an intersection is more interesting after seeing the system of traffic lights represented in a mathematical form. Students will learn those facets of mathematics that strengthen their quantitative understanding and expand the way they know, perceive, and comprehend their world. We hope you enjoy the journey.
