Bluetooth, the curiously named communication standard has taken the world by storm. Now a given feature on everything from smartphones to in-vehicle entertainment systems, Bluetooth has an interesting history and working, proving how versatile this communication standard is. It is managed by the Bluetooth Special Interest Group (SIG), a non-profit, non stock company which mainly deals with setting standards, licensing and

Although wireless networking began to penetrate the market in the 1990s, the technology has actually been around since the 1800s. A musician and astronomer, Sir William Herschel (1738 to 1822) made...

## ~~Chapter 1: Introduction to Wireless Networking Concepts~~ ...

Nowadays, wireless for home networks is almost exclusively Wi-Fi. Wi-Fi is a radio based wireless network following certain standards that we will discuss in this main section. Wireless communication builds upon the same type of communication as wired LAN's. You still use IP addresses and MAC addresses, default gateways, DNS servers
