Game analysis allows us to understand games better, providing insight into the player-game relationship, the construction of the game, and its sociocultural relevance. As the field of game studies grows, videogame writing is evolving from the mere evaluation of gameplay, graphics, sound, and replayability, to more reflective writing that manages to convey the complexity of a game and the way it is played in a cultural context. Introduction to Game Analysis serves as an accessible guide to

analyzing games using strategies borrowed from textual analysis. Clara Fernández-Vara's concise primer provides instruction on the basic building blocks of game analysis—examination of context, content and reception, and formal qualities—as well as the vocabulary necessary for talking about videogames' distinguishing characteristics. Examples are drawn from a range of games, both digital and non-digital—from Bioshock and World of Warcraft to Monopoly—and the book provides a variety of exercises and sample analyses, as well as a comprehensive ludography and glossary.

Parliamo di fantasy e di giochi in questo numero. Vi proponiamo uno speciale su Terry Brooks, super ospite dell'edizione 2010 di Lucca Games, una guida ai giochi fantasy e un singolare racconto-gioco che siamo sicuri vi diventerà. La parte narrativa propone anche stavolta validi "giovani leoni" italiani – Eleonora Rossetti, Bruno Bacelli, Maurizio Cometto e Simone Conti – guidati da un prestigioso nome straniero: la statunitense Pat Cadigan; nota come esponente di spicco del movimento cyberpunk, in C'è vita dopo la riabilitazione? si cimenta in modo originale con il tema vampirico. Parliamo d'Italia anche con i nostri articoli dedicati Med Fantasy, del contributo al fantastico italiano di due grandi scrittori Lino Aldani e Andrea Camilleri e di tradizioni popolari siciliane. Sul fronte internazionale vi proponiamo James Barrie e La Collina dei Conigli, di Richard Adams. Occhio anche al mondo del fumetto con un focus sul mondo dei Manga. Videogiochi, cinema e musica completano il numero con articoli su Assassin's Creed, Harry Potter e i Doni della Morte e la metal band Blind Guardian.

With the advent of new media and Web 2.0 technologies, language and discourse have taken on new meaning, and the implications of this evolution on the nature of interpersonal communication must be addressed. Innovative Methods and Technologies for Electronic Discourse Analysis highlights research, applications, frameworks, and theories of online communication to explore recent advances in the manipulation and shaping of meaning in electronic discourse. This essential research collection will appeal to academic, research, and professional audiences engaged in the design, development, and distribution of effective communications technologies in educational, social, and linguistic contexts.

This collection of contributions was created to prove both the complexity of the contemporary fashion system as well as the richness and openness of an interdisciplinary approach to the field, that is the same that inspires the Master programme in Fashion Studies at Sapienza, University of Rome. All the

authors – either scholars or professionals in their fields – are deeply involved in this educational project and they have conceived each contribution as a pedagogic tool for supporting students in better understanding the social, cultural, economic, technological, creative, environmental aspects of fashion. Therefore, this collection aimed at providing readers with a kaleidoscopic approach, a multitude of voices and perspectives; a set of blended methodologies as well as theories that try to address the challenges of the permanent and accelerating transformations of the fashion system. To understand the future of fashion we have to foster creative as well as critical thinking, working on the knowledge we got from the past and identifying changes in advance, in order to be ready – and prepared – for the challenges that are in front of us.
