'Consulting Pupils' is designed to help teachers to think through the possibilities and protocols of consulting students about teaching and learning, and to consider how to do this within the context of their own school. Using case studies, the authors show the richness of insight that pupils can offer.

The 'ECIS International Schools Directory 2009/10' contains up-to-date facts on more than 800 schools worldwide and comprehensive details of over 570 of them which are ECIS members.

This book empowers people to go beyond themselves into new spheres of learning, thinking and creativity. Drawing on recent work in communications theory as well as psychology, computer science and philosophy, it reveals some key characteristics of learning dialogues. It also demonstrates ways in which computers and networks can deepen, enrich and expand such dialogues. The book's central argument is that this dialogic perspective in education and the latest developments in information and communications technology make ideal partners.

This book draws on extensive research to provide a ground-breaking new account of the relationship between dialogue and children's learning development. It closely relates the research findings to real-life classrooms, so that it is of practical value to teachers and students concerned that their children are offered the best possible learning opportunities. The authors provide a clear, accessible and well-illustrated case for the importance of dialogue in children's intellectual development and support this with a new and more educationally relevant version of socio-cultural theory, which explains the fascinating relationship between dialogues and learning. In educational terms, a sociocultural theory that relates social, cultural and historical processes, interpersonal communication and applied linguistics, is an ideal way of explaining how school experience helps children learn and develop. By using evidence of how the collective construction of knowledge is achieved and how engagement in dialogues shapes children's educational progress and intellectual development, the authors provide a text which is essential for educational researchers, postgraduate students of education and teachers, and is also of interest to many psychologists and applied linguists.

In Building a Learning Nation, Chris Pratt and Allison Chin use powerful evidence to expose serious fault lines in the English learning and education system. The authors show that the result of a thirty-year political consensus on education has been growing child mental ill-health, high levels of educational underachievement, major skill shortages, and a crisis in the retention and recruitment of teachers. Increasing numbers of children leading dysfunctional home lives, coupled with ineffective government education and skills policies over decades, are identified as the principal causes. The book explains how these problems make a defining contribution to the country's sluggish economic performance and deep social divisions. Above all else, Building a Learning National provides a compelling case for change. Unlike other critiques of contemporary education it provides a well thought out, workable alternative: promoting lifelong learning for all; tackling underachievement; supporting families; radically changing the conditions within which schools operate; and developing the skills the nation needs.

In the World Library of Educationalists series, international experts themselves compile career-long collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, major theoretical and practical contributions - so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. Language and the Joint Creation of Knowledge draws on the most prominent writing of Neil Mercer, covering his ground-breaking and critically acclaimed work on the role of talk in education, and on the relationship between spoken language and cognition. The text explores key themes, relating theoretical ideas to research evidence and to practical educational situations that improve children's lives. Offering students and researchers a clear, accessible and up-to-date account of a sociocultural perspective on the relationship between spoken language and cognition, it explains one of the key themes in Neil Mercer's work - that humans have uniquely evolved the capacity to think together, or 'interthink'. Offering a crucial insight into the work of Neil Mercer, this selection showcases why his approach has become the dominant paradigm in educational research, and why it is increasingly influential in the psychology of teaching and learning. This unique collection of published articles and chapters, which represent the key themes and range of his research over the last 40 years, will be of interest to all followers of his work and any reader interested in the role of language in education.

Alfie only feels comfortable when he's drawing comics in the attic—but soon his safe haven will be off limits Alfie is perfectly content to spend his time drawing alone in the attic. Nobody bothers him, and he has his door sealed tight against interruption. Up under the roof, he illustrates amazing cartoon strips about heroes and space adventures, from "Super Caterpillar" to "Super Bird"—even though his own life is anything but exciting. One day, Alfie's mom calls him from the attic to tell him his older brother Bubba will be moving home and will take over the attic as his own apartment. Suddenly Alfie's private world is turned inside out, and he'll need to find a new "home," even if that means spending time around his weird, argumentative family. This ebook features an illustrated biography of Betsy Byars including rare images from the author's personal collection.

KS2 Complete SATs Practice Papers - Science, Maths and English

This indispensable textbook provides the underpinning knowledge to support all teaching assistants working towards Level 2 of the National Occupational Standards. This new edition is fully revised and extended to incorporate and respond to all new materials required to meet the 2007 standards. Taking into account current initiatives including Workforce Remodelling and the Every Child Matters agenda, the book can be used to support NVQs, or other Teaching Assistant awards at level 2, or can be used simply to supplement good practice. This accessible companion: actively engages the reader in activities, developing reflective practice while giving the theoretical background to school-based work gives insight and information about pupils' individual needs helps teaching assistants develop curriculum-based skills to enable more effective classroom support emphasises that teaching assistants are team members, supporting the school and being supported by the school. Contributions from specialist advisers ensure that the ideas and techniques are up to date, relevant and the best practice. All phases of education are covered, from the early years to later secondary years, and references are made to sources of further information throughout the book. The Essential Guide for Competent Teaching Assistants is invaluable in supporting both study and everyday practice. It will also be useful to training providers, teachers and school managers supporting Teaching Assistants in their professional development.
