Describes a program of breathing exercises, yoga poses, and relaxation techniques designed to help children with special needs

Yoga therapy is gaining rapid recognition as a form of treatment that can improve the physical and mental wellbeing of children with a variety of complex needs. This book contains a specially-designed yoga program for use with children of all abilities, and provides both parents and professionals with the knowledge they need to carry out the therapy themselves. The program consists of a series of postures, each of which is explained and accompanied by an illustration. The

postures are designed to help children understand and use their bodies, and work towards positive changes such as realigning the spine, encouraging eye-contact, and promoting calm and steady breathing. Consideration is given to creating the right setting for carrying out the therapy, assessing an individual child's particular needs, and making the sessions fun using games and props. Sections on yoga therapy for specific conditions such as autistic spectrum disorder, Down syndrome, and cerebral palsy are included, and the book concludes with child and parent reports on how the program has worked for them, and a list of useful contacts and resources. This practical book is a must for parents, teachers, therapists and other professionals, and anybody

A how-to manual for yoga with kids in classrooms and therapeutic settings. If you are a parent of a child with special needs or a professional who works with one, you know how challenging it can be for them to sit still, to cope with change, to focus on self-soothing strategies, and to interact successfully with others. For these kids, yoga therapy can provide crucial support. Behavior and focus, strength, flexibility, balance, and self-regulation are all improved through yoga, making it an ideal practice for children on the autism spectrum, with ADHD, sensory processing and emotional/behavioral disorders, and other exceptionalities. For use in

school, at home, or in therapeutic settings, Yoga Therapy for Children with Autism and Special Needs is a how-to manual that meets children where they are, providing a yoga therapy "lesson plan" that will engage them; promote play, social interaction, speech, language, and motor development; and enhance their self-esteem. It teaches an array of CreativeRelaxation techniques using posture, breathing, and mindfulness designed specifically for children with autism and special needs. Drawing on her 30 years of yoga therapy experience with children and those who work with them, the author walks readers through yoga strategies that both calm and energize, emphasizing sensory and bodily awareness and the "sacred space" that is so important for

these children. Learn the best ways to use your voice and body effectively when working with children; how to minimize distractions and ease transitions; and how to create personalized yoga breaks to enhance independence and avert meltdowns. Featuring 60 illustrated poses, 89 photos, and 65 lessons, songs, and games, child-friendly instructions are provided for posture, breathing, and mindfulness exercises. All poses and routines include suggested adaptations and precautions for use, and are organized to address specific sensory skills. Current research on the benefits of yoga for health and learning is summarized, and readers learn how, through yoga practice, the brain ' s response to stress can be effectively mitigated. With this book, parents, therapists, and educators

Following age-appropriate classroom themes, the book's forty detailed, one-hour lessons are designed to supplement any learning environment and are accessible to parents and teachers alike--no special training is required. performance, and attitudes toward themselves. Research also shows that the benefits of yoga are particularly strong among children with special needs. This book demonstrates how yoga can become a fun daily practice inside or outside the school

classroom. Enhanced with over 100 black and white photos, the book's themes, or lessons, are divided by age range (ages four to six, seven to nine, and ten to twelve) and explore topics based on the child's developmental level. For four- to six-year-olds there are twenty hour-long lessons on subjects ranging from colors and the holiday seasons to sounds and words. Ten hour-long lessons for seven- to nine-year-olds introduce such topics as the body, countries of the world, botany, zoology, and the universe. For ten- to twelve-year-olds, ten hour-

long lessons cover the environment, geometry, the Earth, fractions, the food chain, and more. Following the structure of a classroom lesson plan, each lesson incorporates elements of yoga including poses, breath work, meditation, and mindfulness. A discussion of the theme and intention of the lesson is followed by a warm-up of yoga poses. The children then engage in a cooperative "connecting" activity designed to bring them together, and a fun and lively theme-oriented activity that involves movement and awareness. The class winds down with breath work, a craft, and often a story. Finally, there is relaxation time and a guided meditation. With this preset structure, the children feel safe while being challenged and inspired. Derived from the educational philosophy of

the authors' professional expertise with their experience of parenting, offering a range of gentle and fun yoga positions and breathing techniques that are effective in dealing with the increased levels of anxiety, disorientation and tactile sensitivity often found in children with autism spectrum disorders (ASDs). The authors give step-by-step descriptions of warming-up, strengthening, calming, and tension-releasing exercises that are suitable for reducing coping mechanisms, such as hand-flapping, and increasing muscle tone, muscle strength and body awareness. They also offer a range of short and long sequences that can be tailored to fit the needs of the individual child. Wouldn't it be great if your child could exercise, have fun, and build concentration skills all at the same time? In 2006, the Little Flower Yoga program was developed by teacher and certified yoga instructor Jennifer Cohen Harper, when her successful use of yoga in her kindergarten classroom led to requests by other students, teachers, and administrators for yoga programs of their own. Harper slowly began to teach more and more yoga classes, and eventually recruited other yoga teachers with education backgrounds to continue growing what had become a flourishing program. Little
